

The Serene Way Sidewalk project

The Serene Way Sidewalk project was initiated by the Lake Serene Community Association with a request for a walkway along Serene Way from Shelby Road to Lake Road. This project is located in a highly urbanized area in the southwest region of Snohomish County

The proposed walkway is approximately 4500 feet along Serene Way adjacent to Lake Serene. Serene Way is a local access road and consists of two travel lanes with little or minimal shoulders. Drainage from the road collects into the open ditches along both sides of the road. Existing right-of-way for the road is 60 feet.
